

Modelling clay recipe + video tutorial

ingredients

½ cup PVA glue

1 cup cornflour

Directions

- . mix the PVA glue with the cornflour, knead it and it's ready to go
- . that's it, easy hey

Drying

- Roll it out,
- use a cookie cutter or similar to cut out what ever shapes you want
- you can put it in a very low, low oven to dry
- or leave it overnight to air dry
- it can be painted or coloured with crayons, once dried

note: you may need to add extra cornflour if it's too sticky, the idea is to be able to roll it out
