tutorial

these mini passports charms ready made are available for purchase in the artcraftcrazy.com/shop

COVER
(for hot foiling)

template for the passport pages
(use blank paper, or
use pages from an old passport)

MUST USE A TONER PRINTER or a Foil Applicator Machine

This method: use either a Minc or a Laminator

- start by printing the cover sheet directly onto an A4 piece of *dark navy blue* card stock, using black toner (flat, not textured card) you will hardly see the image it is so small and black print, don't worry keep going.
- you only need to **foil the mini passport cover**
- there is an outline around the passport, that will print and be foiled as well. You need this for cut lines
- cut just inside these lines, to get the right size mini passport.
- follow the instructions on the video tutorial to apply the foil using your Minc or a Laminator to the card stock.
- continue with the video tutorial on how to assemble your miniature passport.
