

### step 1 to make the Template

print and cut pattern piece in heavy cardstock  
(keep this for you're template)

### step 2 trace the pattern directly onto pattern paper

this paper needs to be light 100gsm or under because if it's too heavy the sides will crease and look ugly.  
(the sides are not to be creased they stay nice and rounded)

### step 3 cut out the square

using a scissors or craft knife and a ruler cut out carefully keeping it square

### step 4 score the blue line marker 1/4" in

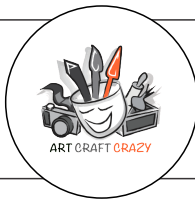

score where the blue line is on the template  
this is for guidance only, it is not to be folded

### step 5 use a dbl sided tape and glue

use a strong glue & or double sided tape, especially at the bottom so it holds well.  
place the glue where the red dots are

### step 6 assembling the pouch

- We are not folding the sides, we want to keep them round, that's what makes this pouch puffy in the middle.
- grab a rolling pin or something round and solid for this part.
- wrap the pouch around the rolling pin and line up the scored line over the top of the glue edge of the side.
- watch the video for better instructions, it's much easier to copy, once you see it done.
- then join the bottom 1/4" only together pressing together with you're bone folder. do not crease up the sides any further than the 1/4"
- punch a 1/8" to a 3/16" hole in the top middle and thread ribbon through
- fill with candy canes and goodies

example

demo only

punch scallop 1 1/4"  
 (solid colour or print)

punch round 1"

suitable for  
 ScanNcut
